

# LineFinder-2000 | 512 Hz Frequency Receiver

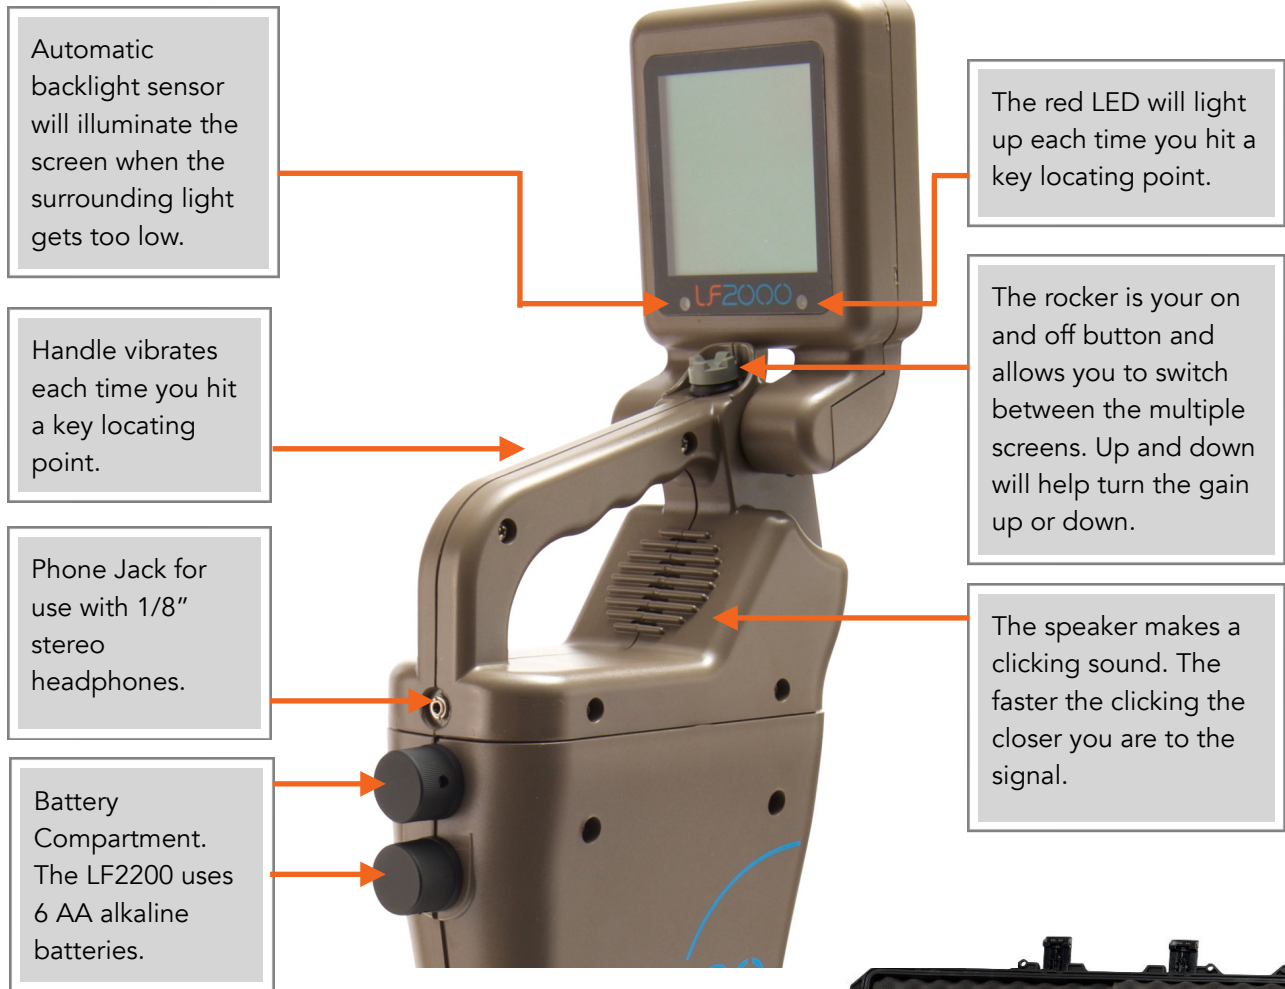

## Locate 512 Hz with ease

Sleek, easy to use with automatic depth calculator for accuracy +/- 10%

The LF 2000 is our original digital locator. If you are only locating in cast iron and nonmetallic lines with the 512 Hz frequency then this is your receiver.

The Storm watertight and impact-resistant case is the perfect accessory to help protect your LineFinder from the elements.

- Three step screens to pinpoint your transmitter and a fourth screen to provide depth.
- Automatically drops gain to keep the signal at the best level for locating.
- 4 Position switch helps you navigate through the screens with ease.
