

LineFinder-2000 | 512 Hz-Frequency Receiver

Sleek and user-friendly, the LF2000 features an automatic depth calculator, making it the ideal accessory for your camera. With a 512 Hz industry-standard sonde frequency, it effectively locates cast iron or non-metallic lines. Additionally, it now has the ability to locate passive power. The Storm case is watertight and impact-resistant, providing excellent protection for your LineFinder against the elements.
